Outcome :

PCo replies from 10.0.0.20 :
bytes = 32, time = 10ms.

PCo replies from 10.0.0.20
bytes = 32, time = 9ms

PCo replies from 10.0.0.20
bytes = 32, time = 7ms

PCo replies from 10.0.0.20
bytes = 32, time = 5ms

So in total 4 packets sent
& received.

Each data packet contains
address info. that a router
can use to determine if the
source & destination are on
the same network.
